THE PARK MERVING .- The Workingmen and friends of Reform generally hold a meeting tonight in the Park, to organize for the election of Reform Common Councilmen in the different Wards of this City. Quite a number of Associations and pubbe meetings have voted to attend this me ching, and it will undoubtedly be a great demonstration. Land Reformers, and all other political reformers, seem to be included in the call.

WIDERING OF LIBERTY-ST .- The Common Council seem to have manufested more folly than usual in regard to this ordinance. The lots on the northern side of the street are from 105 feet to 125 feet in depth, while those on the south side are only 65 feet; yet 5 feet is to be taken off from the former, and 10 feet from the latter! This leaves the southern lots only 55 feet deep,—about space enough for a grocery, and neither fit for a dwelling house or a store. Why did not the collective wisdom of the City take 15 feet off from the northern lots, leaving from 90 to 110 feet in depth, and avoid tearing down

To The Maine Anti-Liquor Law works well. A gentlemen from Porland informs us that the usual commitments to the City Prison have been about 16 per month. From June 1 to Sept. 1, the first three months of the operation of the new law, the whole number of commitments was only eight Also, that the County Jail, which usually has about thirty convicts within its walls, is now nearly empty. Such a law, so executed in this City, would reduce the communicates to our City Prison at least 4,500 the first three months. No small benefit truly.

A number of old buildings in the rear of No. 735 Greenwich st., occupied as stables, were destroyed. The horses were got out in salety. Loss triffing. The VIIIth and IXth Ward Police were on the spot and preserved order.

FIRE .- The alarm of fire at 3 o'clock yesterday afternoon was occasioned by the burning of a sooty campacy in the large orick burding No. 7. Chatham-st. The tramense quantity of heavy smoke that poured from the upper portion of the building gave rise to the apprehension that considerable damage might or our. The fire department, in large numbers, were on the ground with their usual promptness, but their services, fortunately, were not needed, as the fames were extinguished by the occupants of the building before my material damage was done.

DARING ROBBERY-AN EXCHANGE OF-Land Land Control of the rest of the samuel W. Parker, No. 79, hamber-street, under the Irving House, was entered by means of a fall e sev, during the momentary teres, by means of a ball every during the momentary absence of the proprietor, by a young man named George Wilson, who stole about \$200 in bank bills from the window bench. Mr. Parker had left his office for the purpose of getting some uncurrent money discounted, and on his return he entered it intough the Irving House, and observed the accused apparently trying the lock of the outer door. On some into the office, he saw that every thing was in continuon, and that the money has been taken from the window bench. He immediately pursued the third through Chambers street, and finally came up with him in Church-street, a short distance from the thief through Chambers street, and finally came up with him in Church-street, a short distance from the corner. In his flight he had thrown away the key with which he had effected an entrance hat the office. On being charged with the larceny he consessed and offered to restore the money if he was permitted to escape. This Mr. Farker refused to do, and handed him over to the custody of Assistant Capt. Moneypenny, of the Vib Ward, who on searching him found \$172 of the stolen money in his possession. An accompline was seen to join Wilson soon after he left the office, but he managed to escape. The accused was taken before Justice Osborne and committed to prison.

made of cotton duck, from Colt's Factory, Paterson.
New Jersey.
The manufacture of sail-cloth from cotton is one altogether peculiar to the country. Colt's Cotton Duck has always ranked first in public and mutical estimation on this side of the water, and its superiority over other sail-cloths is as well established in the United States as has been that of the yacht America over her English competitors.
Repeated experiments upon square-rigged, as well as upon fore-end-aft vessels, have long since established the fact that Colt's Cotton Duck will propel a vessel one knot at least per hour faster than heno

a vessel one knot at least per hour faster than hemp duck can. Formerly our coasting craft used Russis, Helland and English canvas exclusively, but they have all been long since superseded by American

ection canvas.

It is also used almost exclusively upon the new and magnificent clipper stips of this country, be-cause it best retains the wind, and is much more

and magnificent clipper ships of this country, because it best retains the wind, and is much more durable than any hemp or flax duck.

Some years since a small invoice of American cotton duck was taken to England, with a view of introducing its use among the English yachts. The agent to whose care it was intrinsted, an intelligent American ship-master, offered it to gentlemen interested in yachts at Liverpool, but failed to induce them to purchase. He then offered to gree them sufficient of the canvas for a seit of sails, on condition that they would grant it a fair trial upon one of their slovest yachts, and ascertain whether it would increase the speed of the vessel. Strange to relate, he failed to induce either the yachting gentlemen or the pilots of Liverpool to give the duck a trial upon those terms. Their strong prejudices in favor of English canvas induced them to refuse the Yankee duck as a gift. We think it would be difficult to find a Yankee "skipper" who would refuse a suit of sails upon the conditions above stated.

At the first meeting of the Board of Stock Brokers a rather firmer feeling was apparent. but it did not continue, and at the Second Board it became evident that there was a very powerful special action taken in order to depress the market, which was successful. Erie stock fell to 73; Norwich and Worcester to 45, the former being a decline of 1), and the latter of 3 per cent, from yesterday's prices. Government stocks are very steady, and the Six per Cents of 1867 had advanced a per cent. The mass of sales to-day was for cash.

The searcity of money continues, both for loan and discount, and this state of the Money market is taken advantage of by operators for a decline. The moment the Money market becomes easier a reaction is inevitable.

In order to save the public from loss and meonvenience, I would state that the following Banks have not failed—their notes are bought, and will containe to be bought, at I the cent, discount.

Government Stock Bank, Michigan. Bank of America, New Jersey. Ovenn Bank, do. Atlantic Bank, do. Merchant's Bank, do. Patmer's Bank, do. Delaware and Hudson, do. Nor do I believe any New York Bank, either in the country or city, will fail.

Yesterday being quarterly return day of the City Banks, the amount of specie held jointly by

them was counted, and ascertained to be as follows In Banks. In Sub-Treasury.
